1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William H. Dippert (26,723) on March 1, 2005.

The application has been amended as follows:

In claim 1, at line 14, please replace "on" with - - in - - .

In claim 25, at line 12, after "subsurface region" please insert - - of the substrate- -.

In claim 25, at line 14, after "shifting formation", please insert - - based upon a refractive index change- -

2. The following is an examiner's statement of reasons for allowance: With respect to the embodiment of claim 1, the prior art seeks to heat the coating directly, rather than indirectly through the substrate as it has a higher absorptivity and there would be no collateral damage to the substrate and therefore the prior art teaches away from the claimed invention. With respect to claims 25, the prior art uses laser etching which removes materials when forming phase shifts in the substrate, rather than merely heating the area to modify the refractive index. Most of these prior art processes involve repairing defect or staining the substrate to allow a portion to be removed, which is divergent from the claimed process. Also there is a lesser chance of damage to areas adjacent to the irradiated area as the power threshold is lower and the thermal effects are minimal [0096,0113] and small spot sizes can be achieved due to the use of the ultrashort pulses [0121]. While the use of ultrashort laser pulses to facilitate changes in refractive index, these

have been applied to gratings or waveguides, not masking elements bearing patterned coatings and so are divergent from the claimed invention, which specifies the relation to the coating pattern. Note the discussion in the declaration at points 12-14 and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
